

## OCP MAINTENANCE SOLUTIONS PARTNERS WITH NUCLEOM, EXPERTS IN HIGH LEVEL INDUSTRIAL EXAMINATION

- OCP's subsidiary, which specializes in predictive maintenance and industrial digitalization, has signed a one-year partnership with Canadian company Nucleom, experts in high level industrial examination.
- OCP Maintenance Solutions (OCP MS) develops solutions "Made in Morocco" and provides certifications and innovative training to operators through its training center, OCP MS Academy.
- This collaboration will allow both parties to further develop their services for international markets, particularly in the aeronautics, mining, and oil and gas sectors.

**22<sup>nd</sup> March, 2021** - As part of the development of its offering, OCP MS, a subsidiary of OCP Group, has partnered with Nucleom, the world leader in advanced non-destructive testing (NDT) services and solutions. These help determine what must be repaired or modified in structures or materials without degrading them for safer, more productive, and more profitable industrial installations.

Through this one-year partnership, the two companies will collaborate to meet the needs of different global markets in terms of certifications and industrial maintenance. "This partnership will allow us to offer the Moroccan and, more widely, the African ecosystem, services of industrial expertise and the market's most competitive high-level certification training," said Abdenour Jbili, Managing Director of OCP MS.

Since its creation in 2017, OCP's subsidiary, specializing in reliability, digitalization, and predictive maintenance, has developed considerable knowledge and expertise in industrial maintenance, particularly in the provision of services such as advanced NDT services, business training, and digitalization services adapted for maintenance 4.0.

"We hope to expand our activities and open up to the African market. We naturally approached OCP MS, which represents for us a valued partner and a model in terms of adapted digitalization services as well as professional training," said Mathieu Beauchesne Ing, VP Operations at Nucleom. As a world leader in

high-level industrial certification and advanced NDT, Nucleom trains and offers its consulting services to major industry players, including NASA, Shell, Arcelor Mittal, and Bombardier.

Despite the difficulties presented by COVID-19, OCP MS has been able to adapt in order to ensure the normal functioning of heavy industrial installations. As a result of joint efforts between OCP employees and its partners, the group's subsidiary has also established a training center called OCP MS Academy, which provides certifications and innovative training to operators.

### **ABOUT OCP MAINTENANCE SOLUTIONS**

OCP Maintenance Solutions specializes in advanced reliability and industrial digitalization. The company supports its various clients in improving their industrial practices and succeeding in their digital transformation

### **ABOUT NUCLÉOM**

Nucleom, a Canadian NDE company, has been extensively involved in non-destructing examination services in Canada and internationally. A combination of site experience and NDE tool design know-how gives Nucleom an in-depth perspective of on-site challenges for the NDE system operations. The company benefits from an international reach and retains a high mobility to conduct operations abroad. Nucleom's know-how is based on its high level of in-house expertise, its state-of-the-art equipment and its research and development (R&D) programs, often conducted in partnership with equipment manufacturers.
