# FIRST HALF AND SECOND QUARTER 2023 EARNINGS CONFERENCE CALL PRESENTATION

SEPTEMBER 27<sup>TH</sup>, 2023

# SAFE HARBOR STATEMENT

---

This presentation has been prepared by OCP S.A. ("OCP") strictly for discussion purposes, and contains certain statements that are, or may be deemed to be, "forward-looking statements" within the meaning of the safe harbor provisions set forth in the U.S. Private Securities Litigation Reform Act of 1995. Such statements include, but are not limited to, liabilities, strategic, industrial, commercial plans and expected future financial and operating results such as revenue growth and earnings. They are based on the current beliefs, expectations and assumptions of OCP's management as of the date on which they are made in connection with past and/or future financial results, and are subject to significant uncertainties and risks, which OCP shall not be held liable for. These risks and uncertainties include, but are not limited to, risks and uncertainties arising from the future success of current and strategic plans and future financial and operating results and reserves; changes in such plans and results; any difficulty that OCP may experience with the realization of benefits and anticipated levels of capital expenditures for the second half of the year and beyond; the current and future volatility in the credit markets and future market conditions; OCP's strategy in connection with customer retention, growth, product development and market position; industry trends; volatility in commodity prices; changes in foreign currency, interest and exchange rates; international trade risks; changes in government policy and developments in judicial or administrative proceedings in jurisdictions which OCP is subject to; changes in environmental and other governmental regulation, including regulatory investigations and proceedings; any natural events such as severe weather, fires, floods and earthquakes or man-made or other disruptions of OCP's operating systems, structures or equipment; the effectiveness of OCP's processes for managing its strategic priorities; and OCP's belief that it has sufficient cash and liquidity and/or available debt capacity to fund future financial operations and strategic business investments. Actual results may differ from those set forth in the forward-looking statements contained in this presentation, and OCP undertakes no obligation to publicly update any of its forward-looking statements, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.

This presentation includes OCP's financial statements which are produced in Moroccan Dirhams (the local currency). For ease of presentation, financial information included in this presentation is translated into U.S. Dollars, and these translated figures have not been audited. For the purpose of such translated figures, OCP used the following exchange rate table, which sets forth the year average and year-end Dirham/U.S. Dollar exchange rates for the following periods:

USD/MAD	June 2023	June 2022	December 2022
Period End	9.8798	10.1539	10.4477

# OUTLOOK & PERSPECTIVES

## Demand

- Positive outlook for demand and imports:
  - Strong grain fundamentals, reflecting favorable economics for farmers
  - Depleted stocks worldwide should attenuate hand-to-mouth behavior
  - *Indian imports to continue in the near term*
  - *Good demand recovery in the US and Europe*
  - *Anticipated demand in Africa after several delays in H12023*

## Supply

- Chinese export expected to continue in the short term  
Additional TSP capacity from OCP to ramp up in 2024
- USA use rate is likely to remain at current level
- Limited new alternative sources of supply

## Feedstock

- Balanced Raw Material supply and demand
  - Sufficient **Sulphur** supply supported by ramp up of new production in the Middle East and stable demand from fertilizer producers.
  - Growing domestic production and high port stocks will limit Chinese demand for imported Sulphur.
  - Stable **Ammonia** demand from fertilizer sector and limited demand from industrial sector above normal levels.
  - Launch of new supply capacity in the US in 2024 expected.

**Demand expected to exceed supply worldwide**
